

# HYACINTH

## OVERVIEW

Popular flowering bulb will come back each spring for a few years. Boldly colored flowers pop up in the spring with intensely fragrant flowers. Popular for naturalized landscapes, cottage gardens, and bulb gardens.

## WATER

Bulbs prefer moderate water that drains quickly. Standing water will cause the bulbs to rot. Wait until soil is totally dry before watering.

## LIGHT

Full to part sun.

## SOIL

Prefer loose, well drained soil. Leaner soil is better for sturdier stems.
