

# NARCISSUS

## OVERVIEW

Classic and popular spring blooming bulb with fragrant flowers and a variety of cheery colors and flower shapes. Pollinator friendly, and low maintenance these flowers have been popular for hundreds of years in formal and informal gardens alike. Lovely plants for borders, cottage gardens, or naturalized landscapes.

## WATER

Plants like regular irrigation in the spring during flowering, however they go dormant over the summer after the flowers and greens die back and should not be watered frequently during this time.

## LIGHT

Full Sun

## SOIL

Prefers rich but well drained soil. Soil should never be soggy.
